### Profile

---

I'm a self-taught full stack developer with no professional working experiences but actively searching for internships or junior roles. I love building interactive user interfaces and experiences using the latest, most efficient technologies and design system for the best, easiest and most functional long-term solution that satisfies the clients requirements.

### Skills

---

HTML/CSS	JavaScript	React JS	API's
Sass	TypeScript	Next JS	Express.js
Tailwind CSS	Git/GitHub	Node JS	MongoDB
Framer-motion	Figma	Axios	Redux

### Projects

---

#### Countries - where are you in the world?

A List of Countries of the world from the Countries REST API,

- Integrated with the REST countries API V2
- Generates individual pages for each country on request showing basic facts about the country and its flag
- Optimised for performance and UX. It's very fast for the amount of data being queried and used

Built with – Next JS, React JS, TypeScript, Tailwind CSS, Framer-motion

#### Crowdfund

A crowd funding App for everyone, state your goals and how to crowd fund and let us do the hard parts for you. viewers can select the package they choose to fund. For now, you can simulate how I intend it to look and work as I am only done with the frontend.

Built with – React JS, Tailwind CSS, Vite, Framer-motion, Express JS,

#### Card Details Form

A Single Page App featuring form validation, visualisations and logic on how frontend form / card validations should be done.

### Education

---
